- ❑ Experienced in code quality and test cases review.
- ❑ Ability to work independently as well as team and success with meeting deadline.

Experience summary:

Name of Organization	Period	Designation
Publicis Sapient	31 Dec 2024 – 31 Oct 2025	Sr. Software Engineer
Analec Infotech Pvt Ltd	May 2023 – Dec 2024	Sr. Software Engineer
R Systems	October 2021 – April 2023	Sr. Software Engineer
Research Nester Pvt Ltd	Oct 2018 – 5 Sep 2021	ACL UI Developer
BGV Digital Pvt Ltd	April 2016 – 11 Nov 2017	Sr UI Developer
Acro Engineering Company	Aug 2014 – March 2016	PHP UI Developer

Educational Qualification:

- ❑ BCA/PGDCA

Technical Skills:

Technical Skills	
Technologies	Angular 10, 12, 15, 16, 18, 19, MFE, Angular Material, Typescript, Javascript, HTML, CSS, SCSS,
Editor	Notepad++, Dreamweaver, VS Code
CSS Framework	Bootstrap 4, 5
Operating Systems	Windows
Database	MYSQL Server
Job Functions	Front-end Development with Angular

Significant Project Experience:

Project #1 : CPE
Client : UPS
Domain : Enterprise
Technology : Angular, .Net Core
Database : Oracle
Role : Sr. Software Engineer

Project Description:

- This project is related to convert client report into UPS template specific format and after fill all the required details then convert UPS to Client format using this reverse mapping formatting tool.

Responsibilities:

- Worked to Convert UI into Angular through services, Module, Angular Material, etc.
- Dynamics Tables, Table Refectory (Footer, Header, Pagination, Class, dynamic and remove if else condition) & Clean Up with expendable features. Interceptor and RBack strategies (On Role Based) Code Optimization and ES lint Features. Used best code practices with dry principle (reuseable approach) and the use with proper documentation like NG DOC & JS Doc. Like reuseable cards sidebar filters custom directive like rBack, header Directive, Abstractive class Example for Deactivation Guards, infinite scroll, reuseable Search. Unit testing.

Project #2 : UPS
Client : UPS
Domain : Enterprise
Technology : Angular, .Net Core
Database : Oracle
Role : Software Engineer

Project Description:

- This project is related to Quote, Shipping, Tracking, Account, and Billing modules, built using a Micro-Frontend architecture. It allows customers to generate shipping quotes, manage shipments by Air or Ocean (LCL, FCL), and track delivery until the item is received. The platform ensures modular development and scalability, improving user experience and system performance. **Universal Parcel Service (UPS)** is a global leader in logistics, package delivery, and supply chain management.

Responsibilities:

- Worked on UI with Angular like services, Module, Angular Material, Ng Prime, SonarQube, Daa Analytics, Micro-Front-end(MFE), Unit Testing, etc.
- Worked on state management through NGRS.

Project #3 : Resonate
Client : Analec
Domain : Enterprise
Technology : Angular, .Net Core
Database : Oracle
Role : Software Engineer

Project Description:

- This project is related to generate report in word with predefined data from google of specific stock, with the help of this product client easily create the report for particular stock in stock institutional firm for his client related to stock hold, sell, buy, etc.

Responsibilities:

- Worked to Convert UI into Angular through services, Module, Angular Material etc.
- Worked on state management through NGXS.

Project #4 : Curagaurd
Client : Curagaurd
Domain : Enterprise
Technology : Angular, .Net Core
Database : Oracle
Role : Software Engineer

Project Description:

- This project is related to take care for child whose family do not have people to take care for their child, it's having three modules like agency, provider and family.
